## A WORD FROM OUR PRESIDENT

**Dear customers,**

It is with genuine enthusiasm that I present to you the **2026 edition** of the Portable Winch Co. catalog.

More concise, more streamlined, yet as informative as ever, this new edition perfectly reflects our ongoing commitment to providing you with powerful, easy-to-use tools that are perfectly suited to your needs **in the field**.

This year marks a **major milestone** for our company: the launch of an all-new battery-powered winch, developed in close collaboration with the **STIHL team in Germany**.

The result of the combined efforts of our skilled teams, this collaboration has allowed us to reach new heights in winch **performance** and **efficiency**. We've pushed the boundaries of what's possible to design a model that's truly in a class of its own.

At **Portable Winch Co.**, we're dedicated to offering a human and personalized experience—from helping you choose the right equipment to ensuring your most ambitious projects succeed.

We hope that, page after page, you'll feel the **passion** and **care** we put into every one of our products.

Enjoy the read, and thank you for your trust.

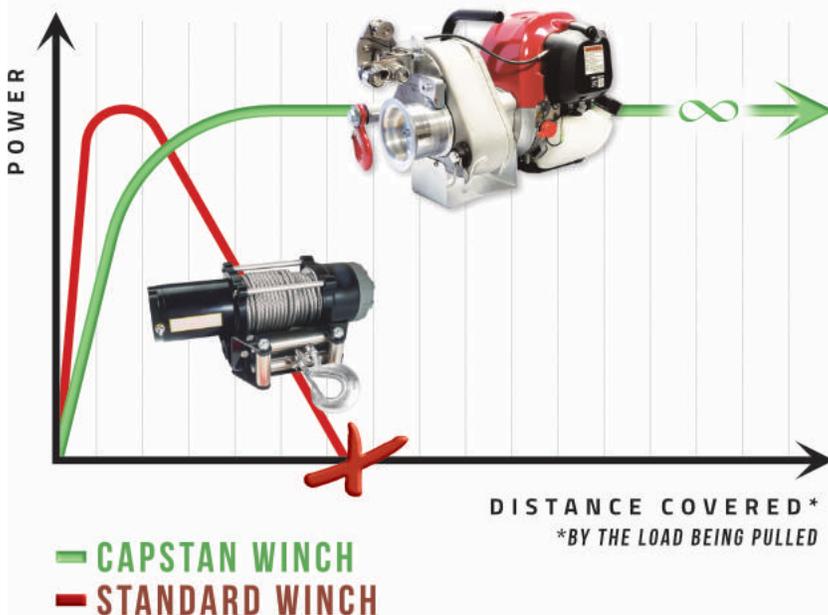

**Best regards,**

# WHY OPT FOR A PORTABLE CAPSTAN WINCH?

- ▶ **PORTABLE:**  
As they are not permanently attached to a vehicle, they offer great freedom of movement when winching.
- ▶ **UNLIMITED ROPE LENGTH:**  
Thanks to the capstan principle, the rope simply grips on the capstan and feeds out, without accumulating, as the operator pulls.
- ▶ **AUTONOMOUS:**  
They have their own power source, making them even more versatile.
- ▶ **POWERFUL:**  
Already offering considerable power, it can be further boosted with snatch blocks. For example, with two double snatch blocks, you can increase your pulling power by a factor of 5!
- ▶ **RELIABLE:**  
Powered by high-quality engines, they are always ready to work hard, and for extended periods of time.
- ▶ **CONSTANT PULLING POWER AND SPEED:**  
Unlike standard winches, capstan winches feature a drum that doesn't accumulate rope. Therefore, they stay the same diameter throughout the pull, providing steady pulling power and speed.

### ► FOR PROFESSIONALS

Get the most out of your APW6000 with the trusted STIHL AP battery. Built for professionals who demand endurance and reliability, this high-performance battery delivers outstanding power and speed for maximum productivity.

# NEW

## THE MOST POWERFUL BATTERY WINCH ON THE MARKET

The APW6000 represents the pinnacle of professional-grade winching, purpose-built for those who demand unwavering reliability in the most challenging conditions. It combines rugged performance with the portability required by professionals such as arborists and field operators.

POWERED BY

# MAXGRIP™ DRUM

For additional friction and increased performance

## STAINLESS STEEL ROPE BRAKE

Cam cleat that acts as an anti-rollback mechanism, with integrated throttle

## ENHANCED PROTECTION

Ground plate and tubing that shield the winch, making it more rugged

## LED INDICATOR - 3 MODES

Making it the most powerful and fastest battery winch with 3 modes to select from - for adaptable productivity

## 80/82V BATTERY-POWERED WINCH

- Brushless electric motor with overload protection, 1.0 kW- 82V
- Powered by Lithium-Ion 80/82V **batteries**
- Drum size: 76 mm / 3"

This revolutionary model develops a remarkable pulling force of 1,000 kg / 2,200 lb without mechanical advantage. Totally maintenance free and zero emissions. A smart choice!

### SPECIFICATIONS :

**PULLING FORCE**  
2,200 LB  
1,000 KG

**SPEED PER MIN**

↳ to link the snatch block to the sling and the hook to the RopeWizer™
- 5 • SAFETY HOOK WITH LATCH**  
↳ to place at the end of the rope to easily attach to the load
- 6 • 6-1/2' (2 M) POLYESTER SLING**  
↳ to attach the snatch block to its anchoring point
- 7 • SINGLE SNATCH BLOCK**  
↳ to either deviate the pull angle or double the power of the winch
- 8 • 8-1/4' (2.5 M) ENDLESS ROUND POLYESTER SLING**  
↳ to anchor the winch wherever you need it!

### ▶ ALSO INCLUDED WITH THE **PCW3000-Li-A**

- 9 • 2.5 AH 82 V LITHIUM-ION BATTERY**
- 10 • RAPID CHARGER**

# ACCESSORIES

## SAFELY CARRY & PROTECT

Ensure your new winch is protected and transport it easily with our selection of carrying equipment.

TRANSPORT CASE  
**PCA-0107**

**For: APW6000, PCW3000-Li, PCW3000, PCW4000**

Designed to hold more than just the winch, it also accommodates essential accessories such as snatch blocks, carabiners, hooks and slings.

PACK FRAME  
**PCA-0108**

**For: APW6000, PCW3000-Li, PCW3000, PCW4000**

Lightweight, comfortable, and versatile, this pack frame lets you attach your winch directly—no extra accessories needed. Its durable steel adapter locks the winch securely to the molded frame for easy transport across any terrain.

HEAVY-DUTY CASE  
**PCA-0102**

**For: PCW3000**

This high-quality, impact-resistant case is molded to perfectly fit the PCW3000 and protect it from shocks or drops. With grooves for easy strapping in or on a vehicle, it can also be securely attached to the Pack Frame PCA-0108.

HEAVY-DUTY CASE  
**PCA-0100**

**For: PCW5000**

Built from tough molded plastic, this case keeps your PCW5000 and accessories secure and organized. With integrated handles, elastic fasteners, and a removable cover, it's ready for any job—rain, snow, or mud.

**PCA-0108**

Conquer distance and rough terrain with ease. Designed for comfort with its padded shoulder straps, and perfect balance, the PCA-0108 keeps your winch close to your body for effortless carrying and total freedom of movement. Go further, work smarter, and keep all your options open—no matter where the next projects takes you.

## ACCESSORIES INCLUDED:

### 1 • SKIDDING CONE (PCA-1290)

↳ to prevent logs from digging in, getting stuck in roots and stumps, while safeguarding the forest floor

### 2 • 7' (2.1 M) CHOKER CHAIN WITH STEEL ROD (PCA-1295)

↳ to firmly choke your logs while the rod makes it easier to pass under the log and thread through the cone

### 3 • GRAB HOOK WITH LATCH (PCA-1282)

↳ to safely connect the choker and the carabiner at the end of your rope

### 4 • SINGLE SNATCH BLOCK (PCA-1274)

↳ to get an extra one in your arsenal to multiply the power of your winch or deviate the pull angle

### 5 • 6-1/2' (2 M) POLYESTER SLING (PCA-1260)

↳ to attach the snatch block to a tree for example

### 6 • STEEL LOCKING CARABINER (PCA-1276)

↳ to link the snatch block to the sling

## PCA **FS** RIG UP YOUR SKILLS

What if you could work more efficiently in the forest? Specialized tools exist to make life easier for loggers like you. Perhaps you never thought to look for a solution, but our experts, with years of experience in the field, have designed this forestry accessory kit to reduce complications, back pain, and even prevent more serious injuries.

# OUR FORESTRY AMBASSADORS

— Chris Wyatt | CTS | ENGLAND

As an arborist, I depend on tools that deliver power and reliability, and the Portable Winch has become indispensable in my work. Whether I'm pulling down trees, hoisting heavy logs, or clearing debris, this winch performs effortlessly in the toughest environments. Its powerful engine ensures I can handle even the heaviest loads with ease, allowing me to focus on precision and safety.

The rugged design and unmatched pulling power of this winch make it a perfect fit for any forestry professional. I've used it in challenging conditions, and it consistently delivers. For those who need serious equipment to tackle serious jobs, the Portable Winch is a game-changer—it's reliable, portable, and ready for anything the forest throws at you.

— Gabriel Michaud Garon | La Cime | CANADA

I work in arboriculture and I know how demanding working in the forest can be. That's why I rely on specialized tools like the skidding cone. It's an essential asset for moving logs over difficult terrains, as it reduces friction on the ground and prevents logs from getting stuck. Whether I'm working in steep forests or muddy conditions, it saves me time and energy.

Used in combination with the Portable Winch, the possibilities are endless. This combo gives me the power and control I need to tackle the most demanding tasks in complete safety, whether it's pulling massive trunks or clearing dense areas. With these tools, even the most arduous tasks become manageable, enabling me to tackle any forestry challenge with efficiency and confidence.

## CUSTOMER REVIEW :

**Chris Morine**

*AMAZING, such a valuable piece of equipment! I purchased this about 8 months ago in the winter. "As a tree climber" for a logging job.*

*Once I started learning how to use it and understanding mechanical advantage, it*

*was on like Donkey Kong! [...]*

*This machine is a huge asset to my small tree climber business. The amount of logs I have pulled up some crazy terrain, is insane [...]*

# OUR HUNTING AMBASSADORS

## → Brody Teale | NON-TYPICAL NATION | CANADA

As the host of Non-Typical Nation, I want to be able to rely on quality equipment, and the Portable Winch has become essential for my hunting trips. Whether carrying gear or retrieving game, this winch is reliable and efficient. Its versatility enables me to navigate difficult terrain with ease, making my outings safer and more productive.

I appreciate its light weight that allows me to take it anywhere with no problem. The winch consistently exceeds my expectations, delivering reliable performance season after season. I enthusiastically recommend the Portable Winch to fellow hunters across the world; it's a real game-changer for serious hunters. I can't imagine going out into the wild without it!

## → Melissa Bachman | DEADLY PASSIONS | UNITED STATES

As an independent woman in hunting, I had been eyeing the Portable Winch for a while, so when I got the chance to try it, I jumped at it! This winch has quickly become indispensable. For a strong woman like me, having reliable tools is essential for my adventures.

I keep my Portable Winch in my truck, ready for anything. Its versatility allows me to use it for big game and various tasks, like clearing trails or getting my truck out of mud. It easily hoists my game into the truck bed.

Knowing I can depend on a well-made product that combines strength, and convenience gives me confidence in the field. The possibilities are endless with this winch, and I can't recommend it enough to fellow hunters seeking a reliable companion on their journeys!

## → Team BORN TO HUNT | CANADA

We own a battery-powered model and can confidently say it matches the strength and efficiency of traditional petrol-powered winches. This Canadian-made product reflects our commitment to responsible hunting and harmony with nature. The battery-powered winch is invaluable in the field, allowing us to retrieve game efficiently while minimizing environmental impact.

From our Canadian adventures to landscapes in the U.S. and Europe, we trust the Portable Winch to tackle various challenges. Its robust performance and portable design make it essential gear, whether in remote areas or on the water. Choosing battery power reflects our commitment to sustainability and ethical hunting practices while endorsing a reputable brand. The Portable Winch has transformed our hunting experiences, and we highly recommend it for enhancing outdoor adventures!

6	<b>PCA-1267</b> Hitch Square Tubing Winch	Coupling for category III vehicles	6

# ACCESSORIES

## SNATCH BLOCKS

In general, each snatch block must be fixed to a solid anchor point using a carabiner and a sling, respecting the appropriate safety factor. Therefore, for each of the blocks, a carabiner of sufficient capacity and a sling are required.

(See "Carabiners - Breaking Strengths" on p. 21)

SNATCH BLOCKS		MAX ROPE Ø	MATERIAL	MINIMUM BREAKING STRENGTH
1	<b>PCA-1275</b> $\phi$ 3" (76 mm) Single Block	3/8" (10 mm)	Stainless steel with aluminum sheaves	60 kN (6,125 kg - 13,500 lb)
2	<b>PCA-1283</b> $\phi$ 3" (76 mm) Double Block	3/8" (10 mm)		90 kN (9,185 kg - 20,230 lb)
3	<b>PCA-1274</b> $\phi$ 4" (100 mm) Single Block	1/2" (12 mm)		135 kN (13,775 kg - 30,350 lb)
4	<b>PCA-1273</b> $\phi$ 4" (100 mm) Double Block			

## CARABINERS

ZINC PLATED STEEL AND ANODIZED ALUMINUM CARABINERS		MINIMUM BREAKING STRENGTH
1	<b>PCA-1276</b> 5/8" (17 mm) Opening	25 kN (2,550 kg - 5,620 lb)
2	<b>PCA-1702</b> 3/4" (20.5 mm) Opening	50 kN (5,100 kg - 11,240 lb)
3	<b>PCA-1703</b> 1-1/4" (32 mm) Opening	65 kN (6,630 kg - 14,615 lb)

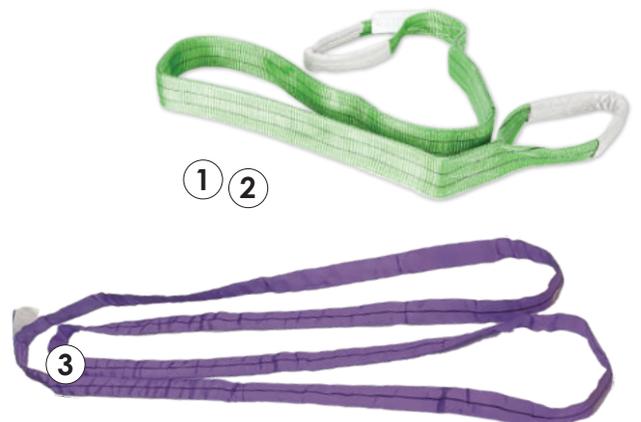

## SLINGS

Our polyester slings have multiple uses :

- To attach a winch to an anchor point; where they will be used in "U" shape;
- To attach a snatch block to a tree or pole where they will be used in choker form;
- To pull a vehicle with another vehicle where they will be used in a straight line;
- And even more !

POLYESTER SLINGS		LENGTH	WLL (WORKING LOAD LIMIT)		
			Straight	Choker	In "U" Shape
1	<b>PCA-1260</b>	6-1/2'	4,400 lb (2,000 kg)	3,525 lb (1,600 kg)	8,800 lb (4,000 kg)
2	<b>PCA-1258</b>	2 m			
		10'			
3	<b>PCA-1350</b>	8-1/4'	2,200 lb (1,000 kg)	1,760 lb (800 kg)	4,400 lb (2,000 kg)
		2.5 m			

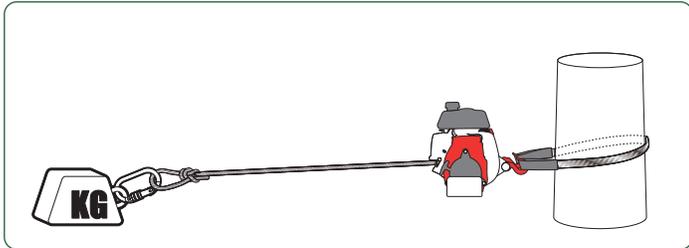

# HOW TO INCREASE PULLING POWER

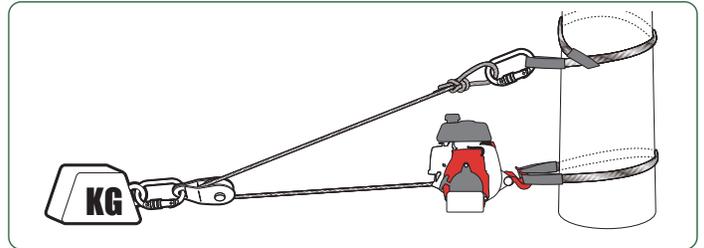

Multiply your pulling power with a mechanical advantage. A block and tackle divides the effort required to move a load. As long as the rope runs parallel and a snatch block is attached to

the load, you multiply the capacity of your system by two, three or even five times. See the scenarios below.

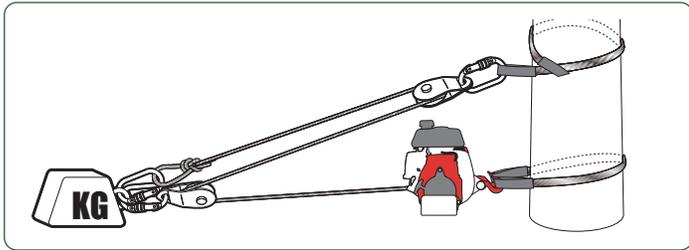

## WITHOUT MECHANICAL ADVANTAGE - DIRECT LINE

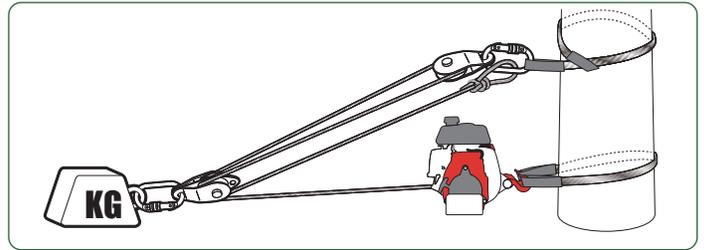

## MECHANICAL ADVANTAGE X 2

## MECHANICAL ADVANTAGE X 3

## MECHANICAL ADVANTAGE X 4

## CARABINERS & SAFETY FACTORS

Portable Winch Co. carabiners have different breaking strengths. When using a mechanical advantage (see above), carabiners are subjected to significant forces. Ensuring an adequate safety factor is crucial for safe use.

Consult the chart to obtain the recommended safety factor for each respective load. Note that in pulling operations, the safety factor is relatively low (2-3), because the risks of serious accidents are lower.

### ▶ A 2nd Carabiner to the Rescue

When the breaking strength of a single carabiner is insufficient to meet the desired safety factor, two carabiners with the openings opposite and reversed can be used to double the breaking strength as shown on the photo.

## SAFETY FACTORS

LOAD WEIGHT	PCA-1276 (25kN - 2,550 KG / 5,620 LB)	PCA-1702 (50kN - 5,100 KG / 11,240 LB)	PCA-1703 (65kN - 6,630 KG / 14,615 LB)
250 KG (550 LB)	10.2	20.4	26.5
500 KG (1,000 LB)	5.1	10.2	13.3
750 KG (1,650 LB)	3.4	6.8	8.8
1,000 KG (2,200 LB)	2.6	5.1	6.6
2,000 KG (4,400 LB)	1.3	2.6	3.3
3,000 KG (6,600 LB)	N/A	1.7	2.2

# ACCESSORIES

## FORESTRY

## BACK TO OUR ROOTS

Even before the arrival of our winches, certain accessories were already making a difference in the field. To this day, the pulling plate (**PCA-1310**), the corner block (**PCA-1270**) and the automatic release (**PCA-1291**) form the perfect trio for skidding your logs with a quad. Simple, robust and effective, these products remain a must-have for any forestry worker.

Scan the QR code to dive into the past with our video! Although it's old, it's incredibly relevant for mastering how to use these accessories effectively.

## HOOKS

SKIDDING CONE FOR LOGS  
20" (50 CM) OPENING  
**PCA-1290**

7' (2.1 M) ROPE CHOKER
